# CENTRE PIVOT & LATERAL MOVE

**Hands-on short course delivered over 2 full days**

## COURSE OVERVIEW

The Centre Pivot & Lateral Move (CPLM) training course is designed to equip participants with practical skills and the latest innovations in centre pivot and lateral move irrigation systems. As CPLM technology rapidly evolves, growers now have greater control over irrigation management, improved water efficiency, and reduced labour demands.

The two-day training course covers key aspects of system operation, performance optimisation, and maintenance to help growers maximise productivity while conserving water resources.

On completion of this course, participants will have the skills to install, operate, maintain, and troubleshoot centre pivot lateral move systems.

## CORE UNITS

**AHCIRG348** - Operate and maintain moving irrigation system

## DELIVERY STRUCTURE

2 full days face-to-face

## COURSE FEES

	Company Member	Individual Member	Non-Member
Full Course	TBC	TBC	TBC
