ELECTROFUSION & BUTT WELDING

Hands-on short course delivered over 2 full days

COURSE OVERVIEW

The Electrofusion and Butt Welding short course covers the skills and knowledge required to weld polyethylene (PE) plastic pipes using electrofusion. It applies to welding of pipes and pipelines undertaken in the field and in factory conditions. Pipelines may be for transmission of water, gas or other liquids.

The course is appropriate for people involved in the installation and maintenance of pipelines transmitting gas and liquids as well as personnel working in the mining sector.

CORE UNITS

PMBWELD301E - Join polyethylene plastic pipelines using butt welding

PMBWELD302E - Join polyethylene plastic pipelines using electrofusion welding
